

G P B D L

Preventive medications are used to prevent certain conditions from developing, or to prevent a condition from coming back. These conditions include, but are not limited to, asthma, depression, diabetes, heart attack, high blood pressure, high cholesterol, osteoporosis, prenatal nutrient deficiency and stroke.

A

This list of the most commonly prescribed generic and preferred brand medication has are part of Cigna's preventive program as of January 1, 2022.^{1,2} Medication are listed alphabetically by condition.

100%, - (\$0) M, P P A C A

(PPACA)

This drug list is provided of enrollment in a complete list of medication. Also, your specific plan's preventive medication program may not include all of the medication and/or condition. For example, some plans don't include medication used to treat depression in their preventive program.

Log in to the MyCigna App or MyCigna.com, or check your plan materials, to see all of the medication included in your plan's preventive medication program and how much they cost.

H

Medication are listed alphabetically by condition. Generic medication are listed in all lower case letters and brand-name medication are listed in all capital letters. Most brand-name medication have a generic equivalent are no longer part of Cigna's preventive medication program.
